About Us

Founded in 2004 in Karaköy, our company has set the principle of increasing its product range and carrying the GWEST brand to the highest level in the sector in which it is located. In order to provide better service to our customers, it moved to the center of İkitelli Organized Industrial Zone in 2014. In 2016, our company, which experienced its first manufacturing experience in 2021, moved to its new location with a closed area of 3000 m² in 2021.

Our company has documented its service and production in international quality standards with ISO, CE and TSE certificates.

As one of our goals, we have achieved high quality in the products we produce, increased product diversity and unconditional customer satisfaction. Güven Elektrik, which has provided unconditional customer satisfaction to the customers it has worked with until today, continues its services by increasing its quality standards.

Provides
Consistent
Performance
and Reliability.

STRONG AND DURABLE

CABLE TIES And Accessories

STAINLESS STEEL CABLE TIES

- Self-locking head design speeds up installation and allows locking at any length along the cable tie body.
- Provides a strong and durable method of cable tying.
- Can be used in a wide range of indoor and outdoor applications.
- With its smooth surface and rounded ends, it guarantees the protection of the cable and the safety of the worker.
- Provides the highest level of support for mains cables.
- For general purpose applications: 304 stainless steel

Material : PE

Thanks to its flexible feature, it helps to organize the cables.
It is suitable for reuse thanks to its strong structure.

Secure
Compression,
Uninterrupted
Transmission

POWER AT THE POINT OF STABILITY!

SKP ECO TYPE CABLE LUG

Gwest Eco Type Cable Lugs

- It is made from copper material in EN/13600 standard
- Copper pipes are used during production to prevent breakage during the tightening process and to prevent relaxation modulus after the tightening process
- Copper with %99.9 conductivity is used in the production
- %100 Tin Platin is made in the range of 5-8 micron.

DIN 46235 TYPE CABLE LUG

- It is made from copper material in EN/13600 standard
- Copper pipes are used during production to prevent breakage during the tightening process and to prevent relaxation modulus after the tightening process
- Copper with %99.9 conductivity is used in the production
- %100 Tin Platin is made in the range of 5-8 micron.

45° ANGLE CABLE LUG

- It is made from copper material in EN61238 standard
- Copper pipes are used during production to prevent breakage during the tightening process and to prevent relaxation modulus after the tightening process
- Copper with %99.9 conductivity is used in the production
- %100 Tin Platin is made in the range of 5-8 micron.

Technical Information

Order Code:	5019
Clamping Range:	10 - 16 mm ²
Length:	266 mm

Cable Lugs

JY-0650A

Technical Information

Order Code:	5074
Clamping Range:	6 - 50 mm ²
Length:	380mm

Cable Lugs

JY-06120

Technical Information

Order Code:	5075
Clamping Range:	16 - 120 mm ²
Length:	650mm

CRIMPING TOOLS FOR CABLE LUGS

Cable Lugs

YQK-70

Technical Information

Order Code:	5052
Clamping Range:	4 - 70 mm ² Copper
Clamping Force:	45kN
Clamping Type:	Hexagon

Cable Lugs

YYQ-120

Technical Information

Order Code:	5050
Clamping Range:	10 - 120 mm ²
Clamping Force:	60kN
Clamping Type:	Hexagon

Cable Lugs

YQK-300

Technical Information

Order Code:	5051
Clamping Range:	10 - 300 mm ²
Clamping Force:	70kN
Clamping Type:	Hexagon

CRIMPING TOOLS FOR CABLE LUGS

Cable Lugs

HZ-400

Technical Information

Order Code:	5071
Clamping Range:	16 - 400 mm ²
Clamping Force:	120kN
Clamping Type:	Hexagon

Cable Lugs

CYO-400C

Technical Information

Order Code:	5072
Clamping Range:	16 - 400 mm ² Copper
Clamping Force:	126kN
Oil Capacity:	145cc

CRIMPING TOOLS FOR CABLE LUGS AND CUTTING TOOLS

Cable Lugs

Copper / Aluminum

HT-2430C

Technical Information

Order Code:	5073
Clamping Force:	24kN
Clamping Range:	300 mm ² Copper
